David,

I received this request from a NGO about odor complaints and thought this was an appropriate question for the JIC.

Thanks

Subject: Gulf coast spill air monitoring

Dear Mr. Delgado,

Maria Martinez from the Air Quality Analysis Section recommended that you might be able to answer a few of my questions regarding the air monitoring being conducted in Louisiana. In my conversations with concerned community members and some of the EPA personnel there seemed to be a bit of confusion about how odor complaints were being handled. I was hoping you could help me understand this better and answer the following questions: Where should people report odors? Who is responding? How were the responses being tracked? Are samples being taken in response to odor complaints? How was the data generated and shared?

Also, Ms. Martinez thought you might be able to give me an estimate for how much a TAGA bus costs (both purchase and operational costs).

Thanks so much for your time and I look forward to hearing from you.

Best regards,
-Miriam Rotkin-Ellman
